

Final Test Summary Report

Project Information

Project Name: AI/ML Web Application

Testing Cycle: Day 6 QA Activities

Prepared By: QA Tester Intern

Date: 18 June 2026

Testing Activities Performed

1. Test Strategy Preparation
 2. Functional Testing
 3. Test Case Design and Execution
 4. Regression Testing
 5. API Testing and Validation
 6. Performance Testing
 7. Security Validation Testing
 8. Defect Reporting and Tracking
-

Test Execution Statistics

Metric	Count
Total Test Cases Executed	50
Passed	48
Failed	2
Pass Rate	96%
Defects Identified	5
Defects Fixed	5
Defects Closed	5

Regression Testing Results

Metric	Result
Test Cases Executed	20
Passed	20
Failed	0
Pass Percentage	100%

Performance Testing Results

Metric	Result
Peak Concurrent Users	200
Average Response Time	2.05 Seconds
Error Rate	1.6%
Performance Status	Passed

Security Testing Results

Metric	Result
Security Scenarios Executed	10
Passed	10
Failed	0
Security Status	Passed

Key Achievements

- Verified all critical business functionalities.
 - Validated API responses and status codes.
 - Executed regression testing successfully.
 - Conducted performance testing under load conditions.
 - Validated security-related scenarios.
 - Tracked and resolved identified defects.
-

Risks

No critical risks remain open.

No blocker defects remain unresolved.

Final Recommendation

Based on functional, regression, performance, API, and security testing results, the application meets quality requirements and is recommended for release.
