

Day 1 Report

Daily Training Report –Tester Internship

Intern Name: Vamshi Krishna K

Role: Testing Intern

Date: 13 June 2026

Training Activities Completed

During today's training session, I focused on understanding and practicing fundamental concepts of Software Testing and API Testing.

1. Manual Testing Fundamentals

- Reviewed the Software Testing Life Cycle (STLC).
- Understood the concept of Test Environment and its importance.
- Learned the difference between Errors, Defects (Bugs), and Failures.
- Studied Positive, Negative, and Boundary Test Scenarios.

2. Test Case Design and Execution

- Practiced writing test cases for sample applications such as Registration and Login modules.
- Included Positive, Negative, and Boundary Value test cases.
- Learned how to document:
 - Test Case ID
 - Test Scenario
 - Test Steps
 - Test Data
 - Expected Results
- Understood the process of recording Actual Results and marking test cases as PASS/FAIL during execution.

3. Defect Reporting

- Practiced preparing Bug Reports using industry-standard fields such as:
 - Bug ID
 - Title/Summary
 - Preconditions
 - Steps to Reproduce
 - Expected Result
 - Actual Result
 - Severity
 - Priority
 - Status

4. Introduction to API Testing using Postman

Successfully performed API testing activities using Postman and public APIs.

GET Request

- Executed a GET request to retrieve user data.
- Verified:
 - Status Code: 200 OK
 - Response Body
 - JSON Response Format
 - Response Availability

POST Request

- Executed a POST request to create a resource.
- Verified:
 - Status Code: 201 Created
 - Successful resource creation
 - Presence of generated ID in the response

PUT Request

- Executed a PUT request to update an existing resource.
- Verified:
 - Status Code: 200 OK
 - Updated information in the response body

Key Learnings

- Understood the practical workflow followed by QA Engineers.
- Gained hands-on experience in designing and executing test cases.
- Learned the basics of API testing using Postman.
- Improved analytical thinking by validating expected versus actual outcomes.

Status: Successfully completed the planned training objectives for the day.
