BUG REPORT 1

Bug ID

BUG_DI_001

Application

DataInsight.ai

Module

Authentication

Summary

Password reset email is not triggered after submitting a valid registered email address.

Severity

High

Priority

High

Preconditions

User account must exist.

Steps to Reproduce

1. Navigate to Login page.
2. Click "Forgot Password".
3. Enter a valid registered email address.
4. Click "Send Reset Link".

Actual Result

No reset email is received by the user.

Expected Result

A password reset email should be sent successfully.

BUG REPORT 2

Bug ID

BUG_SV_001

Application

ScanVista

Module

OCR Processing

Summary

Invoice amount is extracted incorrectly during OCR processing.

Severity

Critical

Priority

High

Preconditions

User logged into the application.

Steps to Reproduce

1. Upload an invoice containing the amount ₹12,500.
2. Start OCR processing.
3. Review extracted information.

Actual Result

The amount is extracted as ₹1,250.

Expected Result

The exact amount ₹12,500 should be extracted.

BUG REPORT 3

Bug ID

BUG_SV_002

Application

ScanVista

Module

Bulk Upload

Summary

Multiple file upload fails intermittently.

Severity

High

Priority

High

Preconditions

User logged into the application.

Steps to Reproduce

1. Navigate to Upload Documents.
2. Select 10 PDF files.
3. Click Upload.

Actual Result

Two files fail to upload without displaying an error message.

Expected Result

All selected files should upload successfully or appropriate errors should be shown.

BUG REPORT 4

Bug ID

BUG_CF_001

Application

CertiFlow

Module

Certificate Validation

Summary

Special characters are accepted in candidate names.

Severity

Medium

Priority

Medium

Preconditions

Certificate generation screen opened.

Steps to Reproduce

1. Enter candidate name as "V@m\$hi Kr!\$hna".
2. Fill remaining fields.
3. Click Generate Certificate.

Actual Result

Certificate is generated with invalid characters.

Expected Result

System should reject invalid characters and display validation message.

BUG REPORT 5

Bug ID

BUG_CF_002

Application

CertiFlow

Module

Certificate Generation

Summary

Duplicate certificates are generated with the same certificate ID.

Severity

Critical

Priority

High

Preconditions

Certificate generation page available.

Steps to Reproduce

1. Generate a certificate.
2. Submit the same details again.
3. Observe generated certificate ID.

Actual Result

Duplicate certificates receive identical IDs.

Expected Result

Every certificate should have a unique identifier.

BUG REPORT 6

Bug ID

BUG_AV_001

Application

AlgoVisualizer

Module

Performance

Summary

Application performance degrades after repeated visualization execution.

Severity

Medium

Priority

Medium

Preconditions

Algorithm visualizer opened.

Steps to Reproduce

1. Execute Bubble Sort visualization.
2. Click Reset.
3. Repeat execution 8–10 times.

Actual Result

Application becomes noticeably slow.

Expected Result

Performance should remain consistent regardless of repeated executions.

BUG REPORT 7

Bug ID

BUG_AV_002

Application

AlgoVisualizer

Module

Responsive UI

Summary

UI elements overlap on smaller screen resolutions.

Severity

Medium

Priority

Medium

Preconditions

Application opened on mobile viewport.

Steps to Reproduce

1. Resize browser window to mobile dimensions.
2. Navigate to visualization controls.

Actual Result

Buttons overlap with the visualization area.

Expected Result

Responsive design should adapt properly without overlapping elements.

BUG REPORT 8

Bug ID

BUG_AV_003

Application

AlgoVisualizer

Module

Session Recovery

Summary

Current visualization progress is lost when the browser is refreshed.

Severity

Low

Priority

Low

Preconditions

Visualization currently executing.

Steps to Reproduce

1. Start any sorting visualization.
2. Refresh the browser page.

Actual Result

Execution progress is lost.

Expected Result

User should receive a warning or the application should restore the previous state.
